

HYBRID PRINT & MAIL: YOUR CLICK TO EFFICIENCY

Invoices, statements or confidential documents – with Hybrid Print & Mail you can send high volume international transactional mail digitally with one click of a mouse. We print it at the destination and manage final delivery around the world quickly and securely. Hybrid Print & Mail is the cost-conscious environmentally friendly way to send bulk international mail.

This is how Hybrid Print & Mail works:

1. You send an electronic file to our secure data center direct or via an FTP server.
2. Our server sorts and sends print files to the respective destination countries.
3. Our local production center prints, addresses envelopes and franks the documents.
4. Final delivery is made via the local mail service provider at your choice of service level.

Your advantages:

We help you accelerate your international mail value chain and make financial savings
